

Day 7: Generate a Christmas Tree in JavaScript

Write a JavaScript program to generate the Christmas Tree pattern below. The tree should be composed of zeroes (`0`), and it must be topped with an asterisk (`*`).

```
*
0
000
00000
0000000
000000000
00000000000
0000000000000
000000000000000
00000000000000000
```

Note: The leftmost `0` should be aligned with the left edge and there *should not* be any blank spaces preceding it on the last line.

Input Format

No input is required to complete this challenge.
